

DIRECTOR OF CENTRAL INTELLIGENCE
Security Committee

SECOM-D-751

10 December 1979

MEMORANDUM FOR: Chief, Security Staff, OD&E
Chief, Special Security Center, OS
Chief, Special Security Center, CIB
DDO/Security Control Officer
NFAC/Security Officer

FROM: Chief, Compartmentation Security Staff/SECOM

SUBJECT APEX

1. In anticipation that the implementation of the APEX system will be imminently forthcoming, we see a need to prepare materials and a briefing scenario to indoctrinate "educators" who will be called upon to conduct APEX briefings for their respective agencies.

2. To enhance this educational process, CIA is preparing a video tape and a copy of the transcript is attached for your information. Initially, the Special Assistant to the DCI will use this video recording in his briefings at high levels within the government; however, with appropriate add-on portions the video recording may be adapted to the levels of audiences requiring APEX briefings and, thus, will be part of a briefing package.

3. To help the educator in his role as the APEX briefer, we see a need to include in the briefer's package not only the APEX Manual, video tape, and briefing guide, but also a compendium of questions which we can expect to arise from those personnel being briefed on the system.

4. Because of your long experience in working with SCI we would personally like you to provide us with questions

that you have or that you feel might be commonly asked by those being indoctrinated in the APEX system so that organizational briefers may be better prepared for their tasks.
